

# LIGHT

## APPLICATION

Light application footwear is mainly used on even and dry floors with a limited risk of contact with liquids.

# MEDIUM

## APPLICATION

Medium application footwear is engineered for dry and wet floors in an indoor environment.

# HEAVY

## APPLICATION

For our professional collection, heavy application means that this type of footwear has special features and can be worn in special areas. More specifically, these shoes and clogs meet special cleaning needs, such as being machine washable or autoclavable.
